Or: <http://addons.prestashop.com/en/content/13-installing-modules>

### II. USE MODULE

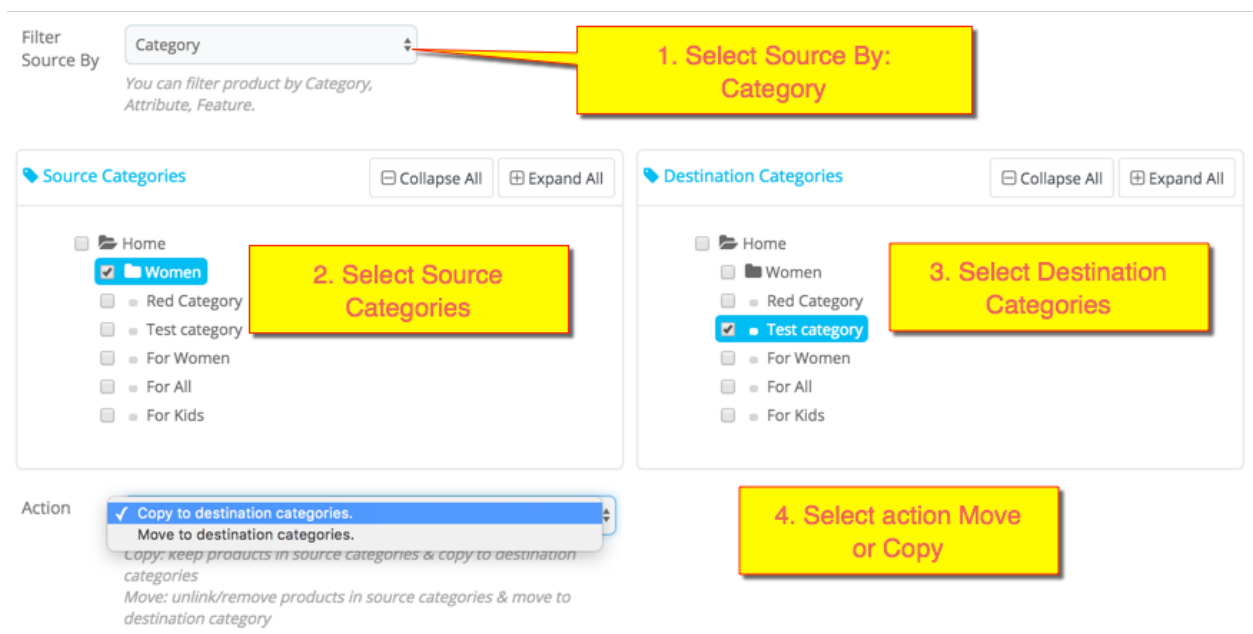

After install, please click to “Configure” to Setup the module and use the module’s features.

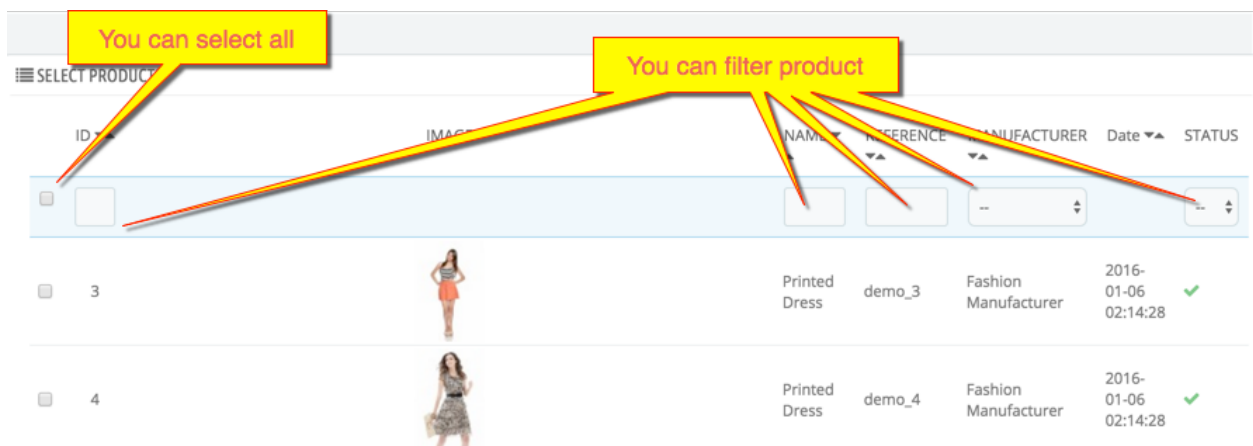

#### 1. Move/Copy product from one/many categories to new categories.

The feature allows you to move/copy product from one or several categories to other categories.

You just need do some step:

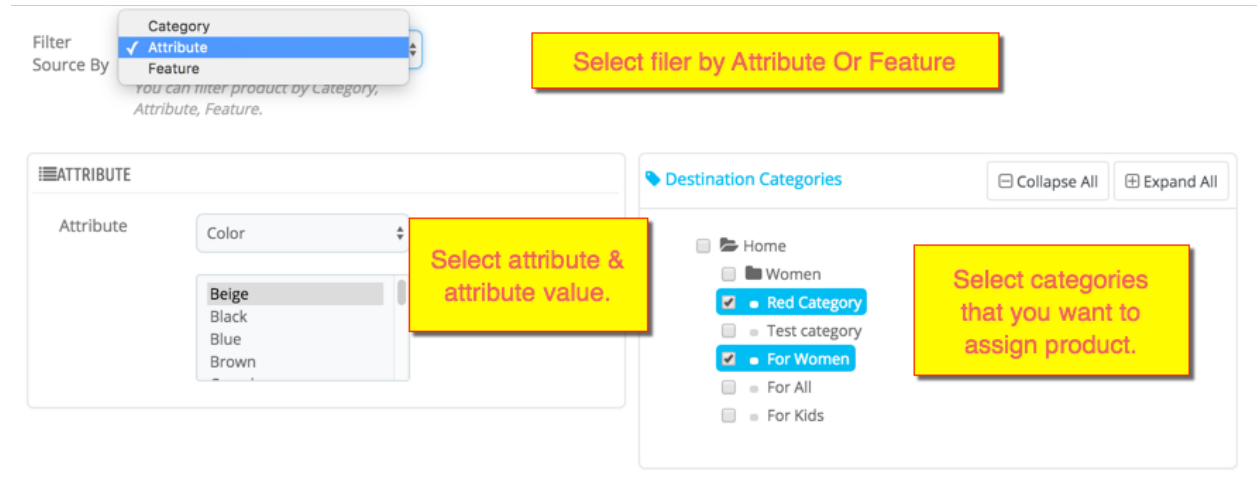

Then you need to select products that you want to copy/move to new categories.

Last step you must click to **Confirm** button to start copy/move product to new categories.

## 2. Assign product to new category by attribute or feature.

The feature allow you select product(s) by attribute then assign the product(s) to category.

The screenshot displays a user interface for assigning products to categories based on attributes. At the top left, a 'Filter Source By' dropdown menu is open, showing 'Category' (selected), 'Attribute', and 'Feature'. Below it, a yellow callout box says 'Select filer by Attribute Or Feature'. The main interface is split into two panels. The left panel, titled 'ATTRIBUTE', shows a dropdown for 'Color' with a list of options: Beige, Black, Blue, and Brown. A yellow callout box over this panel says 'Select attribute & attribute value.'. The right panel, titled 'Destination Categories', shows a tree view with 'Home' and 'Women' categories. Under 'Women', 'Red Category' and 'For Women' are selected, highlighted with blue boxes. A yellow callout box over this panel says 'Select categories that you want to assign product.'. There are 'Collapse All' and 'Expand All' buttons at the top right of the 'Destination Categories' panel.

Then you need to select products that you want to assign to new categories.

Last step you must click to **Confirm** button to start copy/move product to new categories.
