

DOCUMENTATION

Auto set image to product combination by attribute

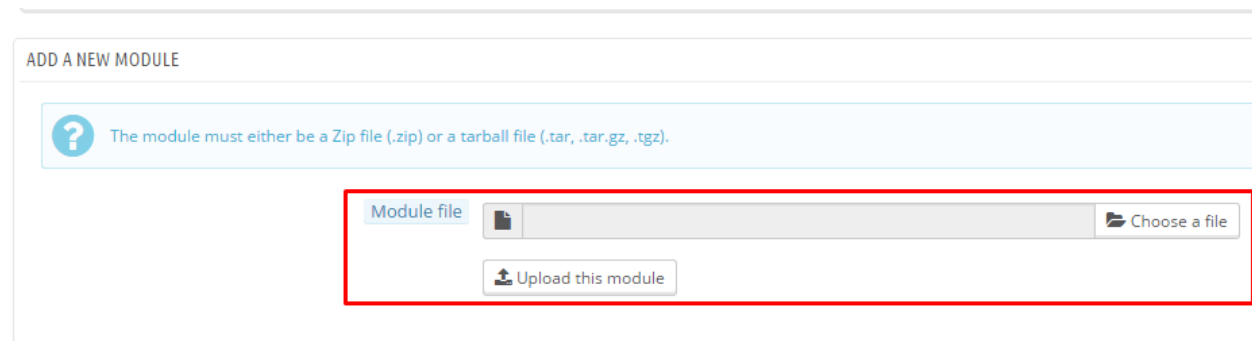

I. Install

Step 1: Login to your *Prestashop Back Office* (admin). Go to *Modules*

Step 2: Click “Add a new module”

Step 3: Choose and upload the modules.

Step 4: Install module

For more information please read this tutorial:

<http://addons.prestashop.com/en/content/21-how-to>

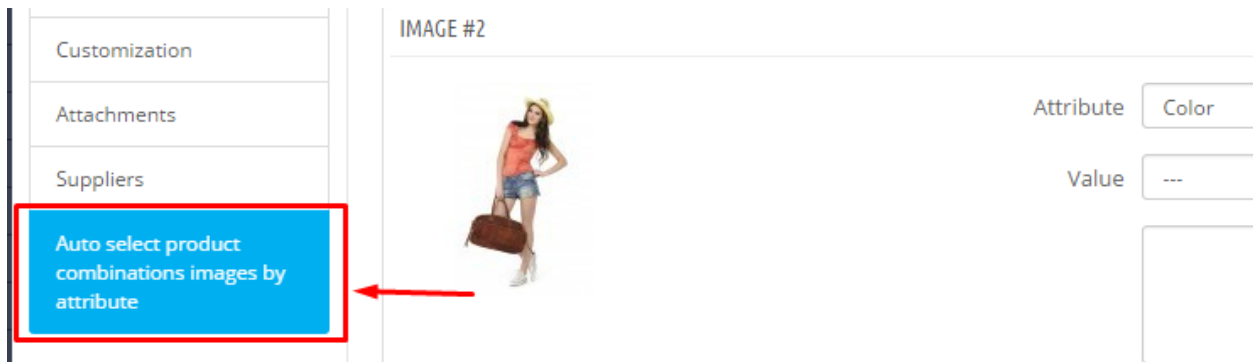

II. Module configuration

There are some configuration in module. You can access by clicking on the “*Configure*” button

III. Use Module

The module will create a new tab on every product.

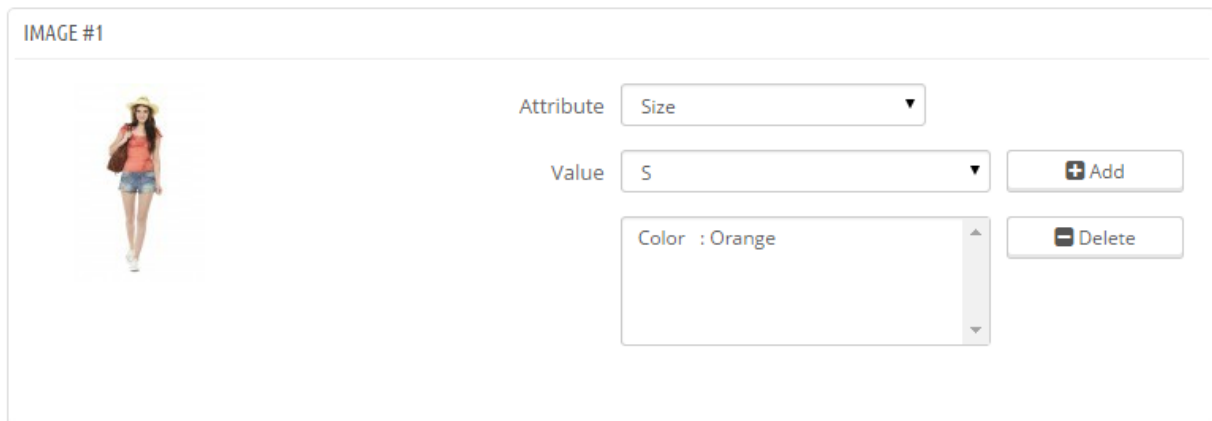

From this tab you are able to assign attributes to every image.

For example:

You set Image #1 for Color : Orange

So the image will be automatic set for combination that has color Orange.

Attribute - value pair	Impact on price	Impact on weight	Reference	EAN-13	UPC	
Color - Orange, Size - S	\$0.00	0.000000lb				Edit
Color - Blue, Size - S	\$0.00	0.000000lb				Edit
Color - Orange, Size - M	\$0.00	0.000000lb				Edit
Color - Blue, Size - M	\$0.00	0.000000lb				Edit
Color - Orange, Size - L	\$0.00	0.000000lb				Edit
Color - Blue, Size - L	\$0.00	0.000000lb				Edit

If you have exist combination and you want to change the image. You have to assign image to attribute then click to button “Save and change combination images”
