I. INSTALL MODULE

Please read this tutorial: <http://addons.prestashop.com/en/content/21-how-to>

Or: <http://addons.prestashop.com/en/content/13-installing-modules>

II. USE MODULE

After install, please click to “Configure” to Setup the module and use the module’s features.

1. Upload Gif image for product.

After install you are able to upload Gif image for your product. But the module will not resize your image. Because resize with take a lot resource of server and long time. So you have to resize your image before upload.

You just upload your image as usual. Go to per product & upload image.

2. Upload your Gif image for logo

Click to “Configure” then upload your logo.

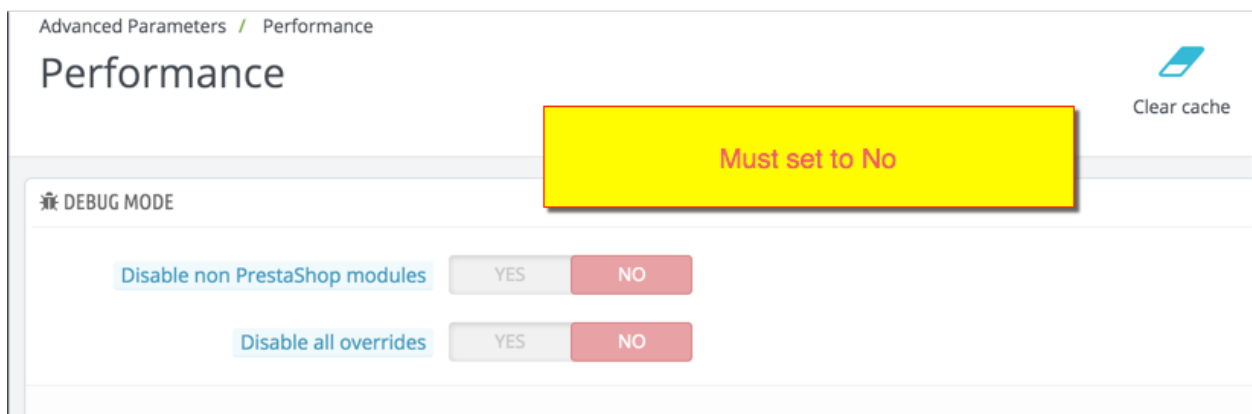

The logo is use for only for web. Not for PDF & Email. So you have to upload your logo (jpg or png) for pdf or Email.

III. Note

The module Override the files:

- controllers/admin/AdminProductsController.php
- classes/controller/FrontController.php
- classes/Link.php

So you need enable Override to make the module work

The module support multi stores. So you should attention correct shop when you configuration module.
